New England Dermatologic Society,
Past President

AREAS OF EXPERTISE
Aesthetic Injectables
Laser Hair Removal
Laser Surgery
Skin Rejuvenation
Thermage™

LOCATION
Concord, MA
Westford, MA
Marlborough, MA

Founded in 1992 and under the direction of board-certified dermatologist, Dr. Samuel D. Goos, the practice consists of three offices, replete with original art, Brazilian cherry floors, suspended glass counter sinks and state-of-the-art exam chairs. The professional, wide-ranging practice consists of 27 treatment rooms, five board-certified dermatologists, four dermatology nurse practitioners, and three medical aestheticians. A team of cosmetic concierges is also on staff to ensure patients receive the best possible service and care. Dr. Goos and his team spend a considerable amount of time analyzing the skin before they recommend a customized procedure, which can range from laser therapy and dermal fillers to chemical peels and hair removal. "You can tell a lot from looking at a person's skin," says Dr. Goos. Dr. Goos has a sophisticated method for treating his patients, based on a system of levels that range from one through four. Level One focuses on good, basic skin care, which includes, for example, sun protection. Level Two consists of a variety of light to medium-depth peels. Level Three includes cosmetic injectables, which are used to eliminate wrinkles, lines and scars and to augment lips. Level Four encompasses laser, light and radio-frequency devices that address everything from excess hair to brown spots. These four levels of cosmetic services allow Dr. Goos to take each patient's skin history into account, and then treat them in a way that is both manageable and effective. 978-371-7010, 978-692-9978, 508-460-9613 or newbeauty.com/goos.

DR. SAMUEL D. GOOS

CHAIRSIDE STYLE Soft-spoken, calm and reassuring
WHY DID YOU BECOME DERMATOLOGIST It allows me to combine medical, surgical and technology-based therapies with an understanding of skin pathology
HEALTH AND BEAUTY TIP I believe in flaxseed oil and primrose oil for people who suffer from dry skin
ALTERNATIVE OCCUPATION Architect
HOBBIES Golf, downhill skiing, waterskiing, antiques and camping with my 9 and 12 year olds
FRAMED PHOTOS ON YOUR DESK My two kids, my wife and our animals, which include dogs, cats and horses
I START EACH DAY At the gym
I'M NEVER WITHOUT A smile
I WOULD LOVE TO OWN A ski cabin in Vail, Colorado

INSIDE INFORMATION

THE LASER SOLUTION

Getting older means signs of sun damage become more prominent. Damage often manifests itself as **BROWN SPOTS OR FRECKLES**. Not only does skin become less even, but overall, it appears less vibrant-looking. Dr. Goos uses the "laser pigment peel" to help reverse many of the signs of this aging. By using the laser to target excessive pigment in the skin, he's able to bring both subtle and more obvious brown spots to the surface and then gently peel them away. Because the laser is used at a low, pain-free setting, he can paint the entire face in just one visit, providing a non-traumatic, **MINIMAL DOWNTIME PROCEDURE**. The instrument used for the **LASER PIGMENT PEEL** is so selective that even the tiniest imperfections and spots are detected and removed, leaving patients with a more even complexion. "While there is no one device that can best treat every problem, lasers are often the most effective solution for targeting specific problems and stimulating the skin."
